

# Naturally Nova Scotia Releases New Organic Echinacea Throat Spray

January 29, 2009

(Lawrencetown, NS) – Naturally Nova Scotia (NNS), Canada's leading manufacturer and distributor of certified organic, whole food natural health products, is excited to be adding a brand new product to their already extensive herbal tincture line; a certified organic Echinacea Spray. This product is the company's biggest seller in Japan.

Echinacea is traditionally used to fight off colds, flus, and infections of the respiratory tract and also helps to strengthen the immune system. Naturally Nova Scotia's new Echinacea Throat Spray is great for preventing colds and flu on the run. Refreshing and soothing, this certified organic Echinacea Spray in a glycerine base is a must-have immune product to keep on hand throughout the year. The spray comes in a 28 ml bottle and is made from certified organic Echinacea whole root and flower extract. All of the naturally inherent constituents in the Echinacea Spray are present, ensuring the stability, bioavailability, and potency of the various active ingredients. The herbs contained in each NNS certified organic herbal product are of the highest quality and are processed using cold temperature techniques to preserve the active ingredients.

NNS, founded in 1994 by Nancy Smithers, has since grown to include a 30,000 sq. foot manufacturing facility on a 250 acre organic farm employing more than 30 people. Organic is a growing and processing method that helps protect the health of people, plants, animals, and the environment. Organic products have been grown naturally, without using harmful hormones, antibiotics, steroids, chemical fertilizers, herbicides, fungicides, and pesticides. Organic farmers follow a holistic system that replenishes the nutrients and maintains the health of the soil by using renewable resources and conserving soil and water to sustain the environment for future generations.

Naturally Nova Scotia's facilities are site licensed by the Natural Health Products Directorate (NHPD) in Canada and are GMP (Good Manufacturing Practices) compliant. The company also manufactures other certified organic whole food products such as their Vitamin C Acerola line, and Vitamin D3.
