

Naturally Nova Scotia Announces New Vitamin C Acerola Chewable and Caplet

January 30, 2009

(Lawrencetown, NS) – Naturally Nova Scotia (NNS), Canada's leading manufacturer and distributor of certified organic, whole food health products, is announcing some updates to their certified organic Vitamin C Acerola line. A 200 mg Caplet will be replacing the 125 mg Capsule and Tablet, and the Adult and Children's Chewables have been reformulated into one tasty, 250 mg chewable tablet that can conveniently be broken in half for children.

A deliciously powerful immune booster, NNS new Vitamin C Acerola Chewable contains 250 mg of Vitamin C from fruit. The tablets are certified organic, non-synthetic, and are blended with organic cranberry, blueberry, red raspberry, and orange juice. Adult dosage is 1-2 tablets a day while kid's dosage is 1/2 of a tablet. The Vitamin C Acerola Caplet is easy to swallow and contains 200 mg of Vitamin C from organic Acerola. Adult dosage is 1-2 caplets per day. The caplets are a great alternative for those who do not care for chewable tablets.

Naturally high in Vitamin C as well as powerful antioxidants, Acerola Berries continue to be the signature Vitamin C source for NNS. Regular consumption of Vitamin C is an integral part of maintaining good health, supporting the immune system, and is a critical factor in forming collagen; a key structural component of bones, skin, ligaments, tendons, and blood vessels. Most Vitamin C supplements are synthetically made from genetically modified corn. Harsh chemicals are used in the process, workers are exposed to them, and waste pollutants are emitted into the environment. The result is a product that contains no natural cofactors to aid the body's digestion of Vitamin C. The Vitamin C in NNS Acerola is entirely from certified organic fruit! Berries are juiced and low temperature dried, preserving the natural constituents (Vitamin C, antioxidants, phytonutrients, etc.). NNS Vitamin C is certified organic, rich in antioxidants, and packed with whole food Vitamin C that the human body recognizes.

NNS, founded in 1994, has since grown to include a 30,000 sq. foot manufacturing facility on a 250 acre organic farm employing more than 30 people. Organic is a growing and processing method that helps protect the health of people, plants, animals, and the environment. NNS facilities are site licensed by the Natural Health Products Directorate (NHPD) in Canada and are GMP (Good Manufacturing Practices) compliant. The company also manufactures other certified organic whole food products such as Vitamin D₃, as well as a line of herbal tinctures and capsules.
